SUNNY®

STORAGE SHEDS

# Градинска барака за инструменти SUNNY Chicago, 312×257x202 cm

# Инструкция за монтаж

За сглобяването са необходими двама души и ще отнеме между 2 и 3 часа.

**ПРЕДУПРЕЖДЕНИЕ!**

· Моля, прочетете внимателно инструкциите преди сглобяване.
· Моля, сглобявайте стриктно според описаните инструкции.
· Моля, преди сглобяване проверете дали всички части са налични.
· За да избегнете наранявания, по време на сглобяването се препоръчва да носите работни ръкавици.

## ПРЕДИ ДА ЗАПОЧНЕТЕ

Ръководство за собственика
Преди да започнете строителството, проверете местните строителни изисквания относно основи, разположение и други изисквания. Прочетете и разберете това ръководство на собственика. Важната информация и полезните съвети ще направят монтажа по-лесен и по-приятен.

**Инструкции за сглобяване:** Инструкциите за сглобяване са включени в това ръководство и съдържат цялата необходима информация за вашия модел. Прегледайте всички инструкции преди да започнете и по време на сглобяването. Следвайте всяка стъпка внимателно.

**Части и списък с части:** Уверете се, че разполагате с всички необходими части.
Отделете съдържанието на кашоните по номерата на детайлите в списъка.
Първите няколко стъпки показват как се съединяват свързани детайли, за да се получат по-големи подкомплекти, които ще се използват по-късно.
Запознайте се с крепежните елементи и аксесоарите, които ще използвате по време на монтажа.
Частите са опаковани в кашоните.
**Забележка: За ваше удобство са предоставени допълнителни крепежни елементи.**

## ПЛАНИРАЙТЕ ПРЕДВАРИТЕЛНО

**Проверете времето:** Уверете се, че денят, който избирате за монтаж, е сух и спокоен. Не се опитвайте да сглобявате сградата в дъждовен ден. Внимавайте за мокра или кална почва.

**Екипна работа:** Когато е възможно, двама или повече души трябва да работят заедно при сглобяването. Един човек може да позиционира детайлите/панелите, докато другият ги закрепва и затяга винтовете.

**Инструменти и материали:** Това са основните инструменти и материали, които ще са ви нужни. Решете кой метод за анкериране ще използвате и какъв тип основа искате, за да направите пълен списък на необходимите материали.

## ГРИЖА И ПОДДРЪЖКА

**Покритие:** За дълготраен блясък периодично почиствайте и ваксирайте външната повърхност. Поправяйте драскотини веднага щом ги забележите. Почистете незабавно и подсушете, след което нанесете боя за корекции според препоръките на производителя.

**Покрив:** Поддържайте покрива чист от листа и сняг. Големи натрупвания на сняг върху покрива могат да направят сградата опасна за ползване. В снежни райони се предлагат укрепващи комплекти за повечето модели, които осигуряват допълнителна защита срещу тежко натоварване от сняг.

**Врати:** Поддържайте водачите на вратите чисти от замърсявания и други частици, които могат да попречат на плъзгането. Смазвайте водачите ежегодно с мебелен полир или силиконов спрей. Дръжте вратите затворени и заключени, за да се предотвратят повреди от вятър. Пазете водачите и вратите от надраскване от твърди предмети. Редовно проверявайте сградата за разхлабени винтове/болтове, износени части и ги затягайте при необходимост.

**Влага:** Пластмасов лист (пароизолация), поставен под цялата площ върху добра вентилация, ще намали конденза.
Други съвети: Измийте, ако е необходимо, и изплакнете с маркуч. Почиствайте с вода и сапун. Силиконов уплътнител може да се използва за водоустойчиви шевове по цялата конструкция.

**Не съхранявайте химикали и запалими вещества в сградата. Горими и корозивни материали трябва да се съхраняват в херметични, одобрени съдове.**

# Инструкция за безопасност при монтаж на пергола

Монтажът на пергола изисква внимание, правилна подготовка и стриктно спазване на правилата за безопасност. Моля, прочетете внимателно следните указания, преди да започнете работа:

**1. Подготовка на работното мя**

⚠ Изберете равна и стабилна повърхност за монтаж.

⚠ Осигурете достатъчно свободно пространство около зоната, за да избегнете инциденти.

⚠ Работното място трябва да е добре осветено и сухо.

▪ Не допускайте достъп на деца или домашни любимци в зоната на работа

**2. Лични предпазни средс**

Носете защитни ръкавици, за да предотвратите порязвания от остри ръбове или метални части.

Използвайте защитни очила при работа с инструменти.

Носете затворени и стабилни обувки, за да предпазите краката си от тежки предмети.

При работа на височина използвайте стабилна стълба и, ако е необходимо, предпазен колан.

**3. Работа с инструме**

▪ Проверете всички инструменти преди употреба. Не използвайте повредени или нестабилн уреди.

▪ Спазвайте инструкциите на производителя за електрически и ръчни инструменти

▪ Винаги изключвайте електроинструментите от захранването, когато не ги използвате

⚠ Работете внимателно, за да избегнете случайни удари или притискане на пръсти.

**4. Монтаж и конструк**

Работете винаги поне по двама души за безопасност и улеснение.

⚠ Проверявайте позицията на всяка част според инструкцията за монтаж, за да избегнете грешки.

⚠ Внимавайте при боравене с метални елементи – възможни са остри ръбове.

▪ Уверете се, че всички болтове и винтове са здраво затегнати

**5. Метеорологични усло**

⚠ Не извършвайте монтаж при силен вятър, дъжд или снеговалеж.

⚠ В случай на внезапна промяна на времето, прекратете работа и обезопасете конструкцията.

**6. След монт**

▪ Проверете стабилността на цялата конструкция

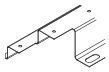

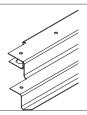

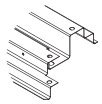

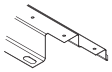

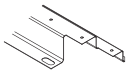

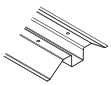

▪ Не окачвайте допълнителни тежести върху перголата, които не са предвидени о производителя.

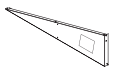

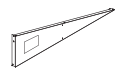

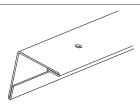

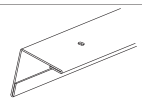

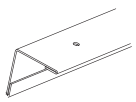

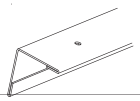

⚠ По време на зимния сезон или при очакван снеговалеж завъртете ламелите във вертикално положение, за да избегнете повреди.

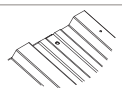

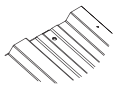

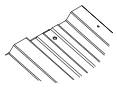

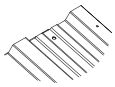

▪ Следете редовно за евентуално разхлабени болтове и извършвайте профилактичн проверки.

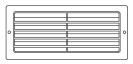

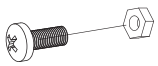

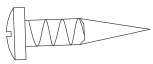

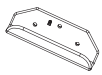

⚠ **Важно:** Неспазването на тези инструкции може да доведе до наранявания, повреди на продукта или риск за безопасността на хората около вас.
